PROFESSIONAL SUMMARY

MuleSoft Developer and Platform Support Engineer with hands-on experience in API development, deployment automation, cloud platform operations, CI/CD troubleshooting, and observability across enterprise production environments. Skilled in MuleSoft Anypoint Platform, AWS EKS, Jenkins, Splunk, Java, and REST APIs with proven impact in automation, platform reliability, and compliance management.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, React
Integration: MuleSoft, Anypoint Platform, RTF, Postman
Cloud/DevOps: AWS, EKS, Kubernetes, Jenkins, CI/CD Pipelines, Docker, Git, Maven
Monitoring: Splunk, SPL, Dashboard Development, Alerts, Observability
Backend: Spring Boot, REST APIs, Microservices, JPA, Hibernate

EXPERIENCE

Cognizant Technology Solutions <i>Programmer Analyst Trainee</i>	May 2025 – Present <i>Pune, India</i>
- Developed and supported MuleSoft APIs using Anypoint Platform, managed deployment configurations, and ensured stable releases across environments for improved platform reliability. - Built automation for contract application creation using Anypoint Exchange REST APIs, JavaScript, and reusable Postman collections, reducing manual effort by 70% and accelerating onboarding. - Developed Java-based utilities to securely decrypt JKS and P12 certificates, improving certificate handling efficiency and strengthening security operations. - Managed and troubleshooted Jenkins CI/CD pipelines, resolved deployment failures, and supported release activities including certificate renewals for smooth application delivery. - Designed centralized Splunk dashboards using SPL with 20+ monitoring panels and proactive alerts, improving issue detection and reducing troubleshooting time across platform applications. - Supported AWS EKS cluster upgrades for non-prod and DR environments, while maintaining Candor scorecard with 20+ controls in GREEN for 4+ months with zero compliance breaches.	

PROJECTS

College Admission Management System (CAMS) <i>Spring Boot, React, MySQL, Microservices</i>
- Developed a microservices-based platform using Spring Cloud with database-per-service architecture for scalability and fault isolation. - Implemented Eureka Service Discovery and API Gateway for centralized routing, secure communication, and service orchestration. - Built responsive frontend using React.js with Vite, improving performance and enabling seamless real-time data flow.
Inclusive Voice Assistant & Sign Language Detection <i>Python, TensorFlow, OpenCV, MediaPipe</i>
- Developed an AI-powered accessibility solution using CNN-based gesture recognition for real-time sign language translation. - Integrated MediaPipe for accurate hand tracking and low-latency voice + visual responses for inclusive user interaction.

EDUCATION

Hirasugar Institute of Technology <i>Bachelor of Engineering in Computer Science (CGPA: 9.28/10)</i>	Dec 2021 – May 2025 <i>Nidasoshi, Karnataka</i>
--	--

ACHIEVEMENTS

- **Best Paper Award** – “Inclusive Voice Assistant and Real-Time Sign Language Detection System,” ICRTET-2025
- Secured **1st Prize** in National-Level SQL Workshop conducted by **IIM Kashipur**
- Winner of National Code Craft Competition at **PRAXIS 2K24**, KLECET Chikodi
- Maintained **100% compliance score** across enterprise Candor scorecard through proactive security governance and vulnerability remediation
